How one student overcame self-doubt in an intimidating career field

Source: UOG Website | uog.edu

"I have come to realize that I was the only person limiting and doubting myself,"

- Eries Moreno

Eries Moreno has overcome an ongoing internal battle. It's something that, as a psychology major, he knew as imposter syndrome — the belief that everyone else knew more than he did and that he wouldn't belong in a prestigious career field. But with each opportunity he's taken advantage of through UOG, less of his mind is occupied by self-doubt and more is dedicated to confidence.

Moreno, a junior who is simultaneously majoring in biology as well, is part of the BUILD EXITO program, a three-year program through Portland State University in which students from underrepresented backgrounds in scientific research are mentored by faculty and peers from their school to identify their research interests, learn how research is performed and documented, and ultimately develop a research project that addresses a health-related issue in the community.

With an interest in becoming a physician-scientist to research and improve health care in Guam, Moreno also became involved with the UOG chapter of the American Medical Student Association, which connected him to upperclassmen and faculty who have offered support and guidance in finding his path.

Culture of Connecting

We humbly invite the community to join "Culture of Connecting," a four-part virtual outreach series where the wartime experiences of our Mafians are put into conversation with the difficult times in which we now live. In the spirit of resiliency, the centerpiece of our rich and long history, we forge ahead by looking to our past. Throughout the Marianas, the kusanman sanyiyong, has always been a site for lively and productive conversations. Culture of Connecting offers a virtual "back kitchen table" where we can gather to share stories that will help us chart a better reality. In re-centering the human experience of WWII on Guam, highlighting coping skills, resources, and cultural values that became tools for survival when all else failed, we offer our youth a bridge to their past, a bridge to their future. Join Culture of Connecting, and be a part of that bridge. For those interested, please email guampedia@gmail.com.

Guampedia is a non-profit affiliate of the University of Guam with operations funded by the Government of Guam's Tourism Attraction Fund.
